leading technical journal
 for the global foundry industry –
worldwide!

powered by:

The leading technical journal for the global foundry industry

What are your favourite markets?
If you have the choice – take all!

Being a specialized English language technical journal for the foundry industry **CP+T International** covers all aspects of foundry technology. Editorial contents include major articles on plant and equipment and many short news items.

Important subjects covered in every issue are:

- Planning and engineering of foundry plants
- Automation
- Coremaking/Binders
- Melting shop
- Pouring process
- Cleaning, fettling and finishing
- Quality assurance

Every 2 months, CP+T International reports on:

- new technologies and processes from international leaders in plant engineering for the foundry industry,
- new construction and modernization projects in the foundry industry all around the world,
- practical experience gained by foundrymen with their facilities and processes.

Feature articles, case studies, professional articles, news and events enable our readers to get a live view into the foundry works in various industrial regions of the world.

Technical information for decision makers

In **CP+T International** your ads not only reach the decision makers in the foundry industry worldwide, but also the multipliers who are important for international business.

CP+T International is dedicated to inform the top and middle management in foundry industries as well as the relevant ministries, officials and consultants.

In addition to the international English language magazine special issues are published in Chinese, Russian and Portuguese language to accompany the economic upswing in Eastern Europe, Asia and South America.
